

RENSAIR

Clean Air. Certified.

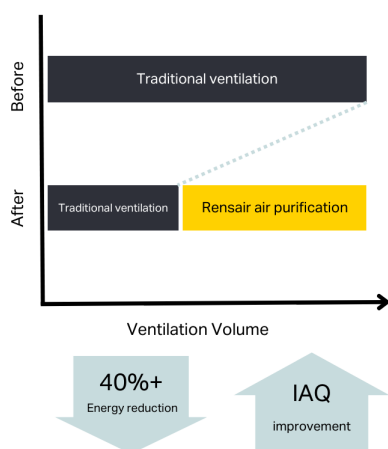

AUTHORISED DISTRIBUTOR

Efficient delivery of clean air

Rensair's patented clean air technology was designed over 20 years ago for infection prevention in hospitals and is proven in the most challenging of healthcare environments.

Indoor Air Quality solutions are now provided for all types of real estate buildings, including offices and educational establishments, leveraging Rensair's healthcare experience and expertise.

A bespoke solution that meets your requirements

Smart Demand Controlled Ventilation

Smart Demand Controlled Ventilation (SDCV) part substitutes expensive mechanical ventilation with substantially cost effective air purification and also ventilates according to occupancy rates, thereby significantly reducing wasteful ventilation when occupancy is low.

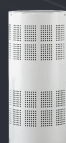

Rensair is implementing SDCV with large multinationals and leading universities. For a typical office building, data confirms that SDCV can reduce ventilation related energy consumption by more than 40% and carbon emissions in excess of 50%.

Our product range - CORE | COMPACT | AIRBUBBL

AirBubbl

Compact

Core

OVERVIEW	Flexible and compact unit that provides hospital-grade purified air for vehicle occupants and personal spaces.	Compact and portable hospital-grade air purifier with WIFI connectivity that's highly effective in removing airborne particulates from small indoor spaces	Our original 'workhorse' product, a portable, hospital-grade air purifier that's highly effective in removing airborne particulates from a wide range of shared spaces.
